2024/25 Saint Matthew Island Section Blue King Crab Season Closed

The Alaska Department of Fish and Game (ADF&G) and National Marine Fisheries Service (NMFS) have completed analysis of 2024 NMFS trawl survey results for the Saint Matthew Island blue king crab stock. The stock is estimated below the federal minimum stock size threshold and, consequently, has been declared overfished. In addition, estimates of 2024 mature male abundance remain below the state harvest strategy threshold for a fishery opening. Therefore, the Saint Matthew Island Section blue king crab fishery will remain closed for the 2024/25 season.

Additional information will be available during the annual ADF&G/Crab Industry meeting. Meeting details will be announced shortly.
